

Commonwealth Accountability Testing System (CATS)

During the 2006-07 school year, students in the end-of-primary (3rd) - 8th and 10th -12th grade participated in the Kentucky Core Content Test (KCCT), the writing portfolio, the EXPLORE and PLAN or the alternate assessment components of the Commonwealth Accountability Testing System (CATS). This assessment and accountability system was designed by the Kentucky Board of Education through a broad, collaborative process that involved educators, legislators, citizens, the School Curriculum, Assessment, and Accountability Council (SCAAC), the Education Assessment and Accountability Review Subcommittee (EAARS), the Office of Educational Accountability (OEA), and the National Technical Advisory Panel on Assessment and Accountability (NTAPAA).

The KCCT assessments were developed under direction of the content advisory committees of Kentucky educators who drafted, reviewed and selected test questions, which were also reviewed by a bias review committee to enhance fairness. Kentucky, as do all other states, addresses its state assessment and accountability requirements, as well as those requirements established in federal statute by the *No Child Left Behind Act of 2001*, through a single testing system. This report focuses entirely on the state aspects of school accountability and reflects the application of student performance standards to the KCCT.

Performance standards are based on descriptions of Novice, Apprentice, Proficient and Distinguished student performance levels specific to the subject and grade being assessed. The performance standards, in conjunction with Kentucky's *Core Content for Assessment*, should allow instruction to better focus on the content to be taught and on how well students must demonstrate achievement in each content area.

CATS Trends (1999-2006 to 2007 and beyond)

In order to maintain the Accountability Index Trend Line, concordance tables have been created to link the Accountability Index trends between the 1999-2006 years and 2007. NTAPAA reviewed the changes that have been made in the Kentucky assessment and accountability systems and concluded that the differences between the old KCCT (1999-2006) and the new KCCT (2007 and beyond) are substantial enough to preclude equating the new assessment to the old. NTAPAA members recommended the construction of concordance tables to make comparisons between results of the old and new assessments. The Kentucky Board of Education directed the use of concordance tables at its April 2007 meeting.

Concordance tables have been developed for the accountability index at each level (elementary, middle and high). The concordance tables use an equipercentile method to compute the linkage between the 2006 KCCT Accountability Index and the 2007 KCCT Accountability Index. By establishing a relationship between the old and new systems, the concordance methodology allows current baselines and goals for the CATS to remain intact.

Due to limitations within concordance models, concordance table adjustments cannot be applied to the subject matter index levels. Beginning with 2007, the concordance-adjusted index is included on each school, district and state customized growth chart page in order to maintain CATS accountability trends and make comparisons.

For more information, refer to the 2007 *CATS Interpretative Guide* on the Kentucky Department of Education Web site (www.education.ky.gov).

Your school's 2007 growth accountability index falls below its goal point and meets or exceeds its assistance point. In order to meet the goal for the biennium, your school will need to meet dropout and novice reduction requirements and have a 2008 accountability index of at least 91.1

Your baseline index is the two-year average of your school's scores but is computed with the district's non-academic index at the corresponding grade level. Your school's goal line, assistance line, and novice reduction rate are calculated from your school's scores and district non-academic data for the baseline years.

* The Adjusted Accountability Index for 2007 is calculated with concordance tables at each level (elementary, middle and high) to link CATS 1999-2006 to CATS 2007.

Gap Identified vs Non-LEP							-14*				-9*	

Subgroup analyses reflect data as reported from school districts. To protect student anonymity, no performance data are reported if there are fewer than 10 students or all students score at the same performance level. Percentages may not sum to 100% due to missing information or rounding. Statistically significant differences (at the .05 level) in scale scores between subgroups are indicated by an asterisk. The standard error for each scale score is reported in parentheses.

Subgroup analyses reflect data as reported from school districts. To protect student anonymity, no performance data are reported if there are fewer than 10 students or all students score at the same performance level. Percentages may not sum to 100% due to missing information or rounding. Statistically significant differences (at the .05 level) in scale scores between subgroups are indicated by an asterisk. The standard error for each scale score is reported in parentheses.
