

## Operations and Algebraic Thinking

Use the four operations with whole numbers to solve problems

4.OA.1

Interpret a multiplication equation as a comparison. Represent verbal statements of multiplicative comparisons as multiplication equations.

## Operations and Algebraic Thinking

Use the four operations with whole numbers to solve problems

4.OA.2

Multiply or divide to solve word problems involving multiplicative comparisons by using drawings and equations with a symbol for the unknown number to represent the problem, distinguishing multiplicative comparison from additive comparison.

## Operations and Algebraic Thinking

Use the four operations with whole numbers to solve problems

4.OA.3

Solve multistep problems.  
a. Perform operations in the conventional order when there are no parentheses to specify a particular order.  
b. Solve multistep word problems posed with whole numbers and having whole number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computations and estimation strategies including rounding.

## Operations and Algebraic Thinking

Gain familiarity with factors and multiples

4.OA.4

Find factors and multiples of numbers in the range 1-100.  
a. Find all factor pairs for a given whole number.  
b. Recognize that a whole number is a multiple of each of its factors.  
c. Determine whether a given whole number is a multiple of a given one-digit number.  
d. Determine whether a given whole number is prime or composite.

## Operations and Algebraic Thinking

### Generate and analyze patterns

4.OA.5

Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern not explicit in the rule itself.

## Numbers and Operations in Base Ten

### Generalize place value understanding for multi-digit whole numbers

4.NBT.1

Recognize in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right.

## Numbers and Operations in Base Ten

### Generalize place value understanding for multi-digit whole numbers

4.NBT.2

Represent and compare multi-digit whole numbers.

a. Read and write multi-digit whole numbers using base-ten numerals, number names and expanded form.

b. Compare two multi-digit numbers based on meanings of the digit in each place, using  $>$ ,  $=$ , and  $<$  symbols to record the results of comparisons.

## Numbers and Operations in Base Ten

### Generalize place value understanding for multi-digit whole numbers

4.NBT.3

Use place value understanding to round multi-digit whole numbers to any place.

## Numbers and Operations in Base Ten

Use place value understanding and properties of operations to perform multi-digit arithmetic

4.NBT.4 Fluently add and subtract multi-digit whole numbers using an algorithm.

## Numbers and Operations in Base Ten

Use place value understanding and properties of operations to perform multi-digit arithmetic

4.NBT.5 Multiply whole numbers

- Up to four digit number by a one-digit number
- Two-digit number by two-digit number

Multiply using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays and/or area models.

## Numbers and Operations in Base Ten

Use place value understanding and properties of operations to perform multi-digit arithmetic

4.NBT.6 Divide up to four-digit dividends by one-digit divisors. Find whole number quotients and remainders using

- strategies based on place value
- the properties of operations
- the relationship between multiplication and division

Illustrate and explain the calculation by using equations, rectangular arrays and/or area models.

## Numbers and Operations - Fractions

Extend understanding of fraction equivalence and ordering

4.NF.1 Understand and generate equivalent fractions.

a. Use visual fraction models to recognize and generate equivalent fractions that have different numerators/denominators even though they are the same size.

b. Explain why a fraction  $\frac{a}{b}$  is equivalent to a fraction  $\frac{(n \times a)}{(n \times b)}$ .

## Numbers and Operations - Fractions

### Extend understanding of fraction equivalence and ordering

4.NF.2

Compare two fractions with different numerators and different denominators using the symbols  $<$ ,  $=$ , or  $>$ . Recognize comparisons are valid only when the two fractions refer to the same whole. Justify the conclusions.

## Numbers and Operations - Fractions

### Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers

4.NF.3

Understand a fraction  $\frac{a}{b}$  with  $a > 1$  as a sum of fractions  $\frac{1}{b}$ .

- Understand addition and subtraction of fractions as joining and separating parts referring to the same whole.
- Decomposing a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions.
- Add and subtract mixed numbers with like denominators.
- Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators.

## Numbers and Operations - Fractions

### Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers

4.NF.4

Apply and extend previous understandings of multiplication to multiply a fraction by a whole number.

- Understand a fraction  $\frac{a}{b}$  as a multiple of  $\frac{1}{b}$ .
- Understand a multiple of  $\frac{a}{b}$  as a multiple of  $\frac{1}{b}$  and use this understanding to multiply a fraction by a whole number.
- Solve word problems involving multiplication of a fraction by a whole number.

## Numbers and Operations - Fractions

### Understand decimal notation for fractions and compare decimal fractions

4.NF.5

Convert and add fractions with denominators of 10 and 100.

- Convert a fraction with a denominator of 10 to an equivalent fraction with a denominator of 100.
- Add two fractions with respective denominators 10 and 100.

## Numbers and Operations - Fractions

### Understand decimal notation for fractions and compare decimal fractions

**4.NF.6** Use decimal notation for fractions with denominators 10 or 100.

## Numbers and Operations - Fractions

### Understand decimal notation for fractions and compare decimal fractions

**4.NF.7** Compare two decimals to hundredths.  
a. Compare two decimals to hundredths by reasoning about their size.  
b. Recognize that comparisons are valid only when the two decimals refer to the same whole.  
c. Record the results of comparisons with the symbols  $>$ ,  $=$ , or  $<$  and justify the conclusions.

## Measurement and Data

### Solve problems involving measurement and conversion of measurements from a larger unit to a smaller unit

**4.MD.1** Know relative size of measurement units (mass, weight, liquid volume, length, time) within one system of units (metric system, U.S. standard system and time).  
a. Understand the relationship of measurement units within any given measurement system.  
b. Within any given measurement system, express measurements in a larger unit in terms of a smaller unit.  
c. Record measurement equivalents in a two-column table.

## Measurement and Data

### Solve problems involving measurement and conversion of measurements from a larger unit to a smaller unit

**4.MD.2** Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects and money.  
a. Solve measurement problems involving whole number, simple fractions or decimals.  
b. Solve problems that require converting a given measurement from a larger unit to a smaller unit within a common measurement system, such as  $2 \text{ km} = 2,000 \text{ m}$ .  
c. Visually display measurement quantities using representations such as number lines that feature a measurement scale.

## Measurement and Data

Solve problems involving measurement and conversion of measurements from a larger unit to a smaller unit

4.MD.3

Apply the area and perimeter formulas for rectangles in real world and mathematical problems.

## Measurement and Data

Understand and apply the statistics process

4.MD.4

Use dot plots to analyze data to a statistical question.  
a. Identify a statistical question focused on numerical data.  
b. Make a dot plot to display a data set of measurements in fractions of a unit ( $\frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{1}{8}$ ).  
c. Solve problems involving addition and subtraction of fractions by using information presented in dot plots.

## Measurement and Data

Geometric measurement: understand concepts of angle and measure angles

4.MD.5

Recognize angles as geometric shapes that are formed wherever two rays share a common endpoint and understand concepts of angle measurement.

## Measurement and Data

Geometric measurement: understand concepts of angle and measure angles

4.MD.6

Measure angles in whole-number degrees using a protractor. Sketch angles of specified measure.

## Measurement and Data

### Geometric measurement: understand concepts of angle and measure angles

4.MD.7

Recognize angle measure as additive. When an angle is into non-overlapping parts, the angle measure of the whole is the sum of the angle measures of the parts. Solve addition and subtraction problems to find unknown angles on a diagram in real world and mathematical problems.

## Geometry

### Draw and identify lines and angles, and classify shapes by properties of their lines and angles

4.G.1

Draw points, lines, line segments, rays, angles (right, acute, obtuse) and perpendicular and parallel lines. Identify these in two- dimensional figures.

## Geometry

### Draw and identify lines and angles, and classify shapes by properties of their lines and angles

4.G.2

Classify two-dimensional figures based on the presence or absence of parallel or perpendicular lines, or the presence of absence of angles of a specified size. Recognize right triangles as a category and identify right triangles.

## Geometry

### Draw and identify lines and angles, and classify shapes by properties of their lines and angles

4.G.3

Identify lines of symmetry.  
a. Recognize a line of symmetry for a two-dimensional figure.  
b. Identify line-symmetric figures and draw lines of symmetry.
