

## **Creative Curriculum**

The philosophy is that children learn best by doing. Learning isn't repeating what someone else says; it requires active thinking and experimenting to find out how things work and to learn firsthand about the world. Play provides the foundation for academic learning. It is a blueprint for planning and implementing a developmentally appropriate classroom.

### **The Goals of the Curriculum are to:**

- *Help children to become enthusiastic learners.*
- *Encourage children to be active, creative explorers and to become independent, self-confident inquisitive learners.*
- *Incorporate giving children choices.*
- *Teach children how to learn and allow them to have a role in how they will learn.*
- *Allow children to learn at their own pace.*
- *Promote good habits and attitudes among children, particularly a positive sense of self.*
