## When Do Employees Need to Use Leave Time?

Working together, we have continued to provide students across Fayette County Public Schools with the resources they need to grow academically, socially and emotionally. There have been many challenges, but through it all, you have demonstrated unwavering commitment to the students we are privileged to serve.

One of the challenges we continue to face across our schools is uncertainty surrounding when staff members should use leave time when they're unable to work. See the following chart for a concise explanation on when staff members should use leave time.

*The safety and health of our students and school community remain our top priority. Thus, to mitigate the spread of COVID-19 across our schools, anyone exposed to the coronavirus must stay home. Additionally, if your doctor has advised that you be quarantined, please be sure to report that information to the district as it may affect others in our school community.*

- [Report a positive COVID-19 test](#)

The district will provide a formal communication to staff members who have been exposed at work to minimize, if not eliminate, further confusion.
