

Use of Space

Purpose: The purpose of this policy is to determine the use of school space to provide an individualized instructional program for students

Policy Statement: The principal shall determine the use of school space during the school day through the consideration of the following factors:

1. Federal, State, and Board policies, requirements and restrictions
2. Primary, grade level, and team teaching groups
3. Adequate space and ventilation
4. Traffic flow of children and amount of student movement

Any changes made will be discussed at a faculty meeting and presented to the Council by the principal.

Classroom assignments shall be tentatively made prior to the closing of the school year. Staff members will be notified in writing prior to the opening of the school year if any space reassignments have been made.

Use of the building outside of school hours will be governed by district policies. Within the district parameters the principal will annually approve if a before and after school care program will be offered (and through which organization) with input from the SBDM Council.
